**Oxford Journals usage statistics service**

Please select a report from the list on the left.

This service includes data from the time period beginning January 2009.

**Important information for customers regarding service availability**  
From time to time, we need to carry out routine maintenance and upgrades to our usage statistics system. To ensure minimum disruption, we aim to schedule these changes to happen during off-peak periods only (between 7-14th of each month). In these periods you may experience some delays and interruptions, although we will try to ensure they are kept to an absolute minimum. We apologize for any inconvenience which this may cause.  
Ray Allen  
Systems Development Manager, Oxford Journals

**Note for users of COUNTER JR1 and JR1a reports**  
By default the service will create a report for the year-to-date, as required by the COUNTER code of practice. It is possible for you to customize these reports to provide report detail from other time periods, and we believe that you may find this useful. However, please note that the format of such a customized report would not fully comply with that specified by the COUNTER code of practice.

**March 2009 usage statistics restated**  
Due to technical problems encountered during data processing, usage statistics for March 2009 have been restated on 6 May 2009. We advise customers who downloaded their March 2009 usage statistics prior to 12 noon on 6 May 2009 to download them again. We would like to apologize for any inconvenience caused. Usage statistics for January and February have been unaffected by the problem.

**Archive data**  
Please visit our [pre 2009 usage stats page](#) for earlier data.
